

# Final project presentation rubric

Math 106

I will grade your presentation based on the following.

1. Content. Informative. The focus is clear; the explanations are clear. Includes intuition, ideas, and good examples. Explains high-level ideas of a proof before giving details. Demonstrate good understanding of topic. No math errors.
2. Organization. Logical flow is clear. Presentation has a clear story arch, e.g. beginning with a clearly explained problem and ending with a satisfying resolution of that problem.
3. Scope. Right amount of material for a 20-minute talk. Good pace.
4. Presentation. Speak clearly. Slides self-contained and easy to read/boardwork is organized. Answer questions correctly.
5. Creativity. Presentation goes beyond references (including choice of pictures and notation), is engaging and interesting, and includes appropriate visual/prop/demonstration/game/etc.

Additional note: I will expect that you have incorporated the feedback I gave you on your outline and slides. Please let me know if you have any questions.
